e-mail: ars.ashuha@gmail.com

I am a Research Scientist at Isomorphic Labs @ London (UK), where I work on AI-first drug design and understanding of human biology 🤖+🧬=💊. I did a PhD in AI/ML at BayesGroup, so I can make big overcomplicated DNNs work. The results of my PhD contributed to sparsification, uncertainty estimation, ensembling, and fundamentals of Bayesian deep learning. I was a part of Samsung AI, Yandex Research, and University of Amsterdam. During my undergrad and master's, I did some ML engineering internships in deep learning for music, recommendation systems, and user modeling.

PROFESSIONAL EXPERIENCE

2022 Oct - *now*
Research Scientist AI, Isomorphic Labs (Alphabet Inc.)
I work on AI-first drug design and understanding of human biology 🤖+🧬=💊.

2018 April - 2022 *May*
Research Scientist AI, Samsung AI Center
I worked on the development of deep learning algorithms. Specifically, my work is focused on uncertainty estimation, robustness, and fundamentals of Bayesian deep learning. I also contributed to computer vision research e.g., image inpainting.

2016 *Feb* - 2018 April
Research Scientist AI, HSE & Yandex & University of Amsterdam
Created *sparse variational dropout*, *a* method for sparsification of DNNs that, for the first time, allowed to achieve over 250x compression ratio (results published at ICML'17). The modified version of SparseVD with neuron-level sparsity allowed to accelerate inference of a CNN by 2-5 times and was involved in the feature extraction for real image retrieval system (published at NeurIPS).

2016 *May* - 2016 *Sep*
Machine Learning Engineer Intern, Yandex
I worked on feature extraction techniques for music data with convolutional neural networks. I also developed an evaluation of learned representations. The representations were used in the content-based recommendation system for Yandex music.

2015 *May* - 2015 *Oct*
Machine Learning Engineer Intern
Worked on recommendation systems. My responsibility included improving the quality and performance of automatic feature extraction algorithms, and recommendation algorithms.

EDUCATION

2017 - 2022
PhD in Machine Learning, **National Research University Higher School of Economics**
Thesis title: Prior Knowledge for Deep Learning **Advisor:** Dmitry Vetrov

2015 - 2017
MSc in Computer Science, **Moscow Institute of Physics and Technology** (worked on sparse DNNs) with Distinction (GPA 4.87/5.0)

2011 - 2015
BSc in Computer Science, **Bauman Moscow State Technical University** (worked on language models)

TECHNICAL SKILLS

- **Deep Learning**, **Deep Neural Networks**, **Machine Learning**, **Modeling**;
- I'm fluent in **Python** and I used to code in C/C++, Go, language is not a problem after all.
- I'm also fluent with common data science tools such as **NumPy**, **matplotlib**, **scikit-learn**, **pandas**.
- I'm comfortable with the common data science environment e.g., **bash**, **git**, **Linux**.
- My primary deep learning framework is **PyTorch**. Prior to that, I had an experience with Theano+Lasagne and TensorFlow.
- Comfortable with **GPU clusters and distributed training**.
- I have experience with **MapReduce**, Hadoop, Hive, and Spark.

CODE

- **Research-ready implementations:**
  - LaMa Image Inpainting (⭐2.9k)
  - Multi-GPU SimCLRv1 closely reproduced results on both CIFAR-10 and ImageNet
  - Ensembles (Deep ensembles, Snapshot ensembles, cSGLD, FGE, etc.)
- **Simple MVP implementations of ML algorithms:**
  - Real NVP normalizing flows
  - Quantile Regression DQN (Distributional RL)
  - Equivariant GNN

THESIS CO-SUPERVISION

- Alexander Lyzhov (moved to NYU)
  - Deep Neural Network Ensembles: Analysis and Approaches to Diversification (MSc, 2020)
- Andrei Atanov (moved to EPFL)
  - Effective Learning of Deep Neural Networks Ensembles (BSc, 2018)
  - Learning Deep Models with Small Data (MSc, 2020)

- Evgenii Nikishin (moved to Mila)
  - Stability Improvement and Knowledge Transfer in Deep Reinforcement Learning (MSc, 2019)

PROGRAM COMMITTEE

- Neural Information Processing Systems, NeurIPS:
  - 2019: top-50% highest-scored reviewers
  - **2021: outstanding reviewer award (top-8%)**
- International Conference on Machine Learning, ICML (2019, 2020)
  - 2020: top-33% highest-scored reviewers
- International Conference on Learning Representations, ICLR (2020, 2021)
- ICML Workshop on Invertible Neural Networks (2019, 2021, invertibleworkshop.github.io)
- Bayesian Deep Learning Workshop (since 2017, bayesiandeeplearning.org)

TEACHING

- Supervisor of reading clubs on machine learning at HSE and Yandex school of data analysis (since 2017)
- A lecture with a practical session on Normalizing Flows at DeepBayes Summer School (2019, links: 1, 2)
- Lecturer, Moscow Institute of Physics and Technology:
  - A lecturer and a manager of a deep learning part of ML course (ml-mipt.github.io).
  - A lecturer of DL part and an instructor of practical sessions of the *Data Mining in Action* course (link).
