I'm a Research Scientist at Samsung AI Center Moscow. I (almost) received a PhD in Machine Learning. The results of my PhD were published at ICLR / ICML / NeurIPS and contributed to sparsification, uncertainty estimation, ensembling, computer vision, and fundamentals of Bayesian deep learning. Prior to that, I was a part of Yandex Research in collaboration with University of Amsterdam, where I worked on Bayesian deep learning with Dmitry Vetrov and Max Welling. I did ML engineering internships at Yandex (deep learning for music), Rambler (recommendation systems), and worked on NLP with Natalia Loukachevitch.

EDUCATION

- PhD in Machine Learning (2017-2021), National Research University Higher School of Economics
 - o PhD Thesis: Prior Knowledge for Deep Learning
 - Advisor: Dmitry Vetrov
- MSc in Computer Science (2015-2017), Moscow Institute of Physics and Technology (with distinction)
- BSc in Computer Science (2011-2015), Bauman Moscow State Technical University

PROFESSIONAL EXPERIENCE

- Research Scientist, Samsung Al Center Moscow (2018 Now):
 I'm working on the development of deep learning algorithms. Specifically, my work is focused on uncertainty estimation, robustness, and fundamentals of Bayesian deep learning. I also contributed to computer vision research e.g., image inpainting.
- Research Scientist, Yandex.Research & University of Amsterdam (2016 2018):
 Created sparse variational dropout, a method for sparsification of DNNs that, for the first time, allowed to achieve over 250x compression ratio (results published at ICML'17). The modified version of SparseVD with neuron-level sparsity allowed to accelerate inference of a CNN by 2-5 times and was involved in acceleration of the feature extraction for real image retrieval system (published at NeurIPS).
- Machine Learning Engineer Intern, Yandex.Music (summer of 2016):
 I worked on feature extraction techniques for music data with convolutional neural networks. I also developed an evaluation of learned representations. The representations were used in the content-based recommendation system for yandex music.
- Machine Learning Engineer Intern, Rambler&Co (May Oct 2015):
 Worked on recommendation systems. My responsibility included improving the quality and performance of automatic feature extraction algorithms, and recommendation algorithms. The project was heavily based on MapReduce.

CODE

- Simple MVP implementations of ML algorithms:
 - Real NVP normalizing flows
 - Quantile Regression DQN (Distributional RL)
- Research-ready implementations:
 - Multi-GPU SimCLRv1 closely reproduced results on both CIFAR-10 and ImageNet
 - Ensembles (Deep ensembles, Snapshot ensembles, cSGLD, FGE, etc.)

FRAMEWORKS & PROGRAMMING LANGUAGES

- I'm fluent in Python and I use to code in C/C++, Go, language is not a problem after all.
- I'm also fluent with common data science tools such as numpy, matplotlib, scikit-learn, numpy.
- I'm comfortable with the common data science environment e.g., bash, git, linux.
- My primary deep learning framework is PyTorch. Prior to that, I had a decent experience with Theano+Lagange and TensorFlow.
- Comfortable with GPU clusters and distributed training.
- I have experience with MapReduce, Hadoop, Hive, and Spark.

REVIEWING

- Conferences:
 - International Conference on Machine Learning, ICML (2019, 2020 top-33% highest-scored reviewers)
 - Neural Information Processing Systems, NeurIPS 2019 (top-50% highest-scored reviewers)
 - International Conference on Learning Representations, ICLR (2020, 2021)
- Workshops:
 - ICML Workshop on Invertible Neural Networks (2019, 2021, invertibleworkshop.github.io)
 - Bayesian Deep Learning Workshop (since 2017, bayesiandeeplearning.org)

TEACHING

- Supervisor of reading clubs on machine learning at HSE and Yandex school of data analysis (since 2017)
- A talk & a practical session on NFs at **Deep | Bayes** Summer School on Bayesian Deep Learning (since 2017)
- Lecturer, Moscow Institute of Physics and Technology: I was a lecturer and manager of the deep learning brunch of a facility-wide machine learning course ~60 students (ml-mipt.github.io). Also, I taught deep learning and practical sessions on cutting-edge ML algorithms on a facultative course "Data Mining in Action" ~ 200 students (bit.ly/3eRLGYp). The goal of this course is to make ML education available for everyone for free.

SUPERVISION

- Alexander Lyzhov (moved to NYU, PhD student), Deep Neural Network Ensembles: Analysis and Approaches to Diversification (MSc, 2020)
- Andrei Atanov (moved to EPFL, PhD student), Effective Learning of Deep Neural Networks Ensembles (BSc, 2018), Learning Deep Models with Small Data (MSc, 2020)
